2) Click on 'sys.txt' which is on the bottom of <http://www.fiatnavigation.com/en/fiat-qubo-3/> _ page.

Important Navigation Update: This update is for the users who has trouble to change program language

We have released a new update for your navigation unit.

Please download and replace the file to your "Navigation" folder on your SD Card.

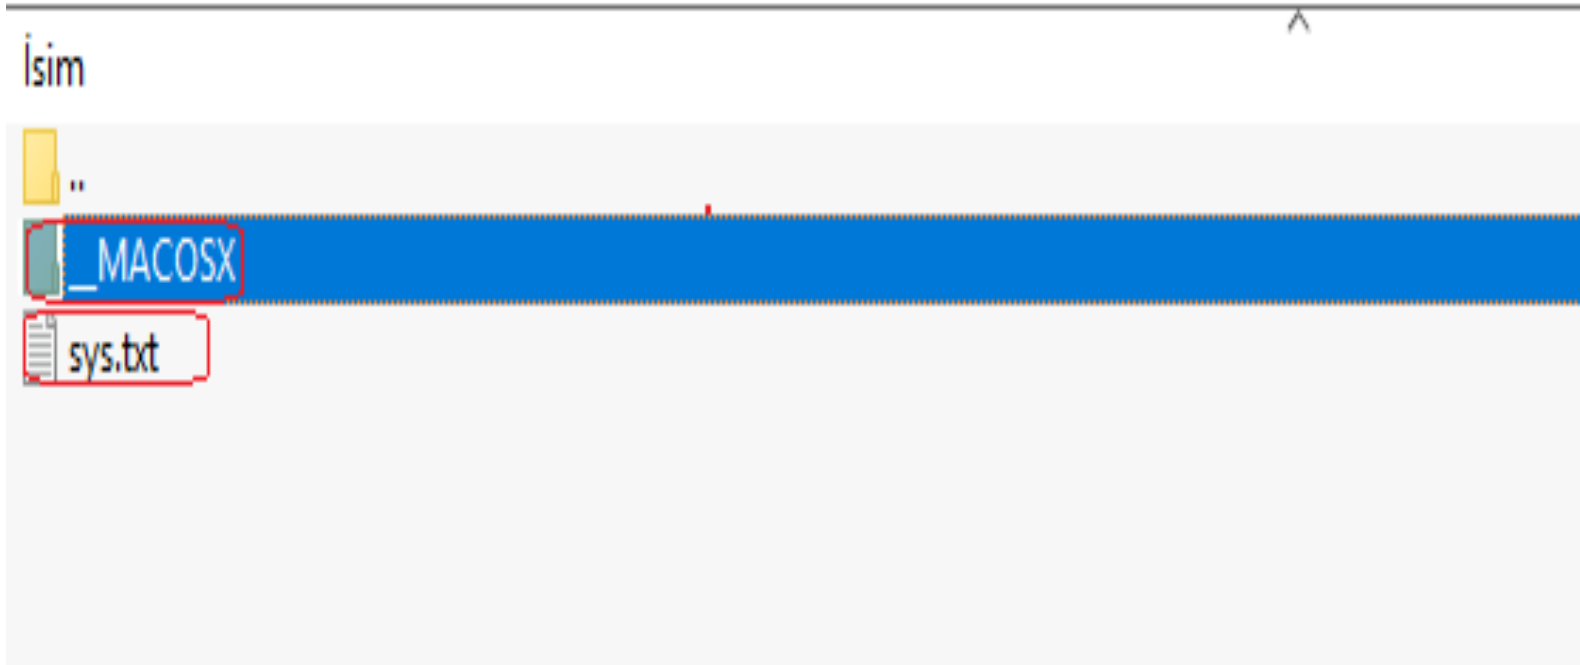

Please read instruction first.

1. Take out your SD Card form your navigation unit and connect to your PC.
2. Open the "Navigation" folder located on your SD Card. (see the image)
3. Download the "sys.txt" file from the link
4. Unzip the downloaded file
5. Replace the newly downloaded file with old "sys.txt"

3)

a) If operating system of your computer is Windows ; Right click on “sys.txt” file and copy, then save it your computer

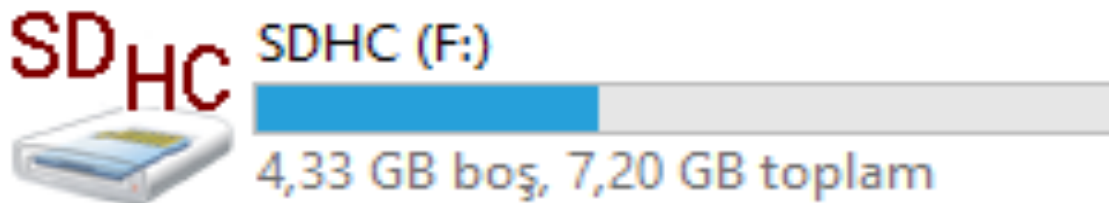

B) If operating system of your computer is iOS ; Open _MACOSX folder, copy Right click on “._sys.txt” file and copy, then save it your computer

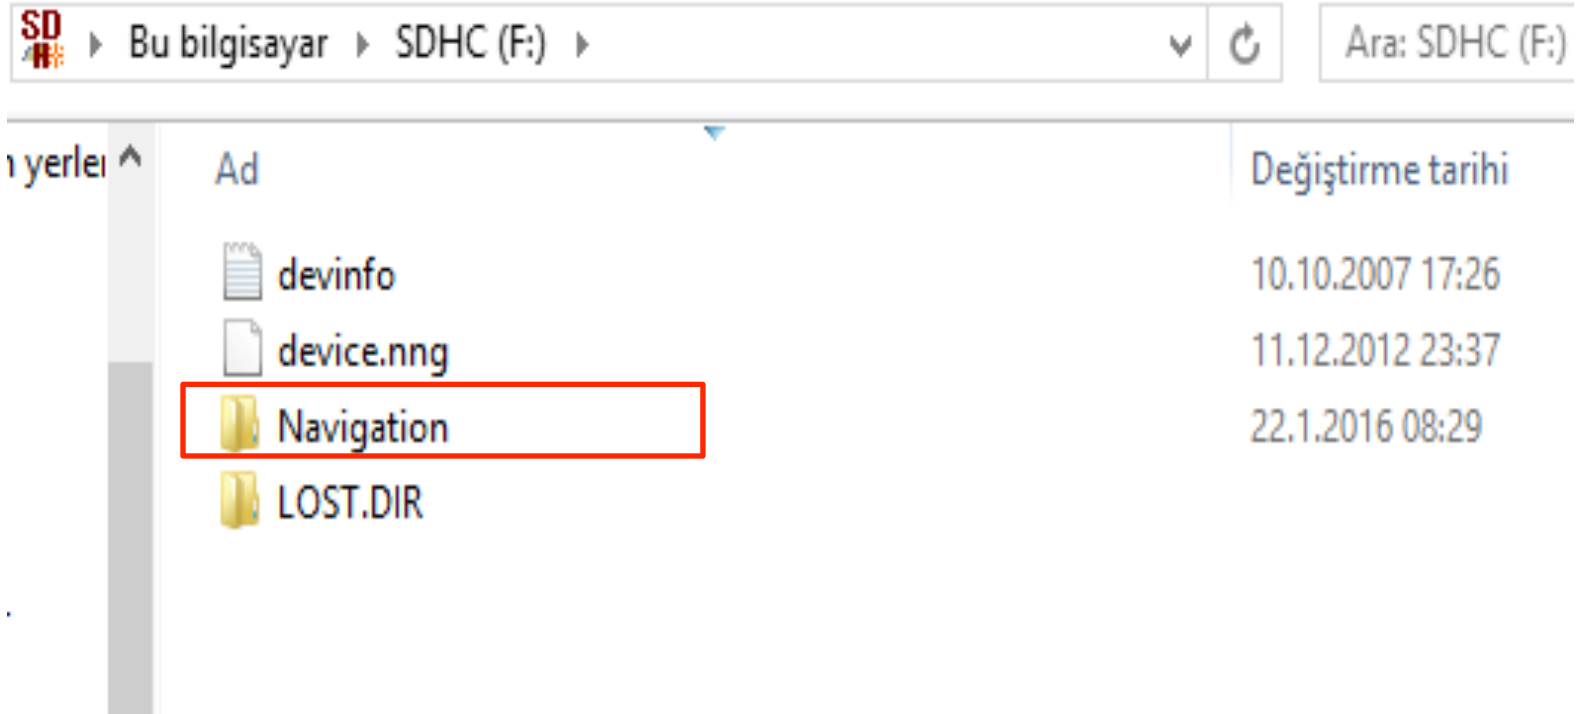

4) Remove the navigation card from the map card slot on the device or from the user manual.

5) Plug Sd card into the card adapter that was sent together with user manual and put into Sd card slot of your computer. Open the SD Card drive in your computer

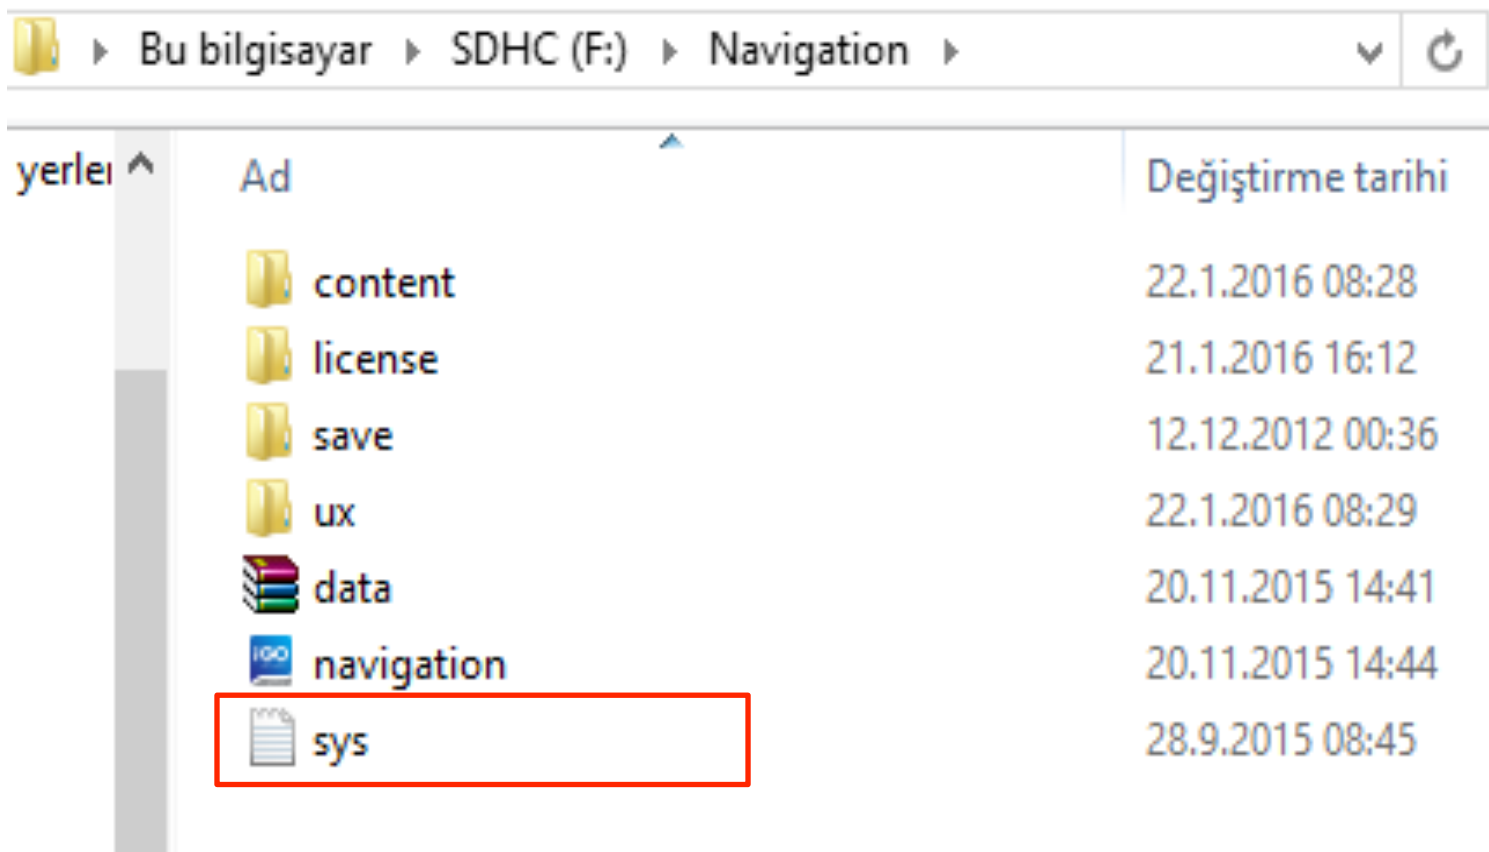

6) Open the Navigation folder

7) Delete 'sys' file in navigation folder.

Copy the file that you saved into your computer on step 3 into the same location of deleted sys...

8) Remove the SD card from your computer and plug into map card slot of your multimedia unit.
